SUMMARY:

Full Stack Developer with hands-on experience building scalable and responsive web applications using JavaScript, React, Node.js, TypeScript, and Python. Experienced in delivering government and enterprise-level projects, integrating APIs, optimizing performance, and collaborating with cross-functional teams. Focused on writing clean, maintainable code that improves user experience and business outcomes

TECHNICAL SKILLS:

- Frontend** - JavaScript , React Js, Redux, Nextjs13, TypeScript,Python
- Backend** - Node.js, Express.js, TypeScript
- Databases** - mysql, MongoDB
- DevOps&Cloud**- Docker,Kubernetes,AWS

EXPERIENCE: Junior Software Engineer – Vyoma Innovus Global, Kolkata (July 2025 – Present)

- Designed and developed full-stack web applications using React, Node.js, and MongoDB.
- Implemented authentication, payment integrations, and responsive UI, increasing user engagement by 40%.
- Optimized database queries and backend logic, reducing load times by 30%.
- Collaborated with clients and internal teams to deliver solutions on time and within budget

EDUCATION

Aryabhatta knowledge University Patna,Bihar Bachelor’s of Technology, Computer Science CumulativeGPA:8.3 (8/2017 - 08/2021)	XII Purnea,Bihar Govt.inter College Zilla school, Purnia Percentage: 58% (05/2015 - 05/2017)

Industry PROJECTS

Smart Traffic Management System (Kolkata Police, Department of IT, WB)

- Developed a **dashboard UI** using **React.js** to visualize traffic status and alerts.
- Developed a real-time **traffic monitoring** to reduce congestion and improve vehicle flow efficiency.
- Conducted **performance optimization**, reducing average traffic waiting time.

CCTV Integrated Management System (Kolkata Police, Department of IT, WB)

- Built a centralized platform to **monitor CCTV health status** across multiple traffic signal locations.
- Implemented **real-time device status tracking** to detect whether a camera is online, offline, or malfunctioning.
- Designed **automated alert notifications** to immediately inform responsible teams about camera outages.
- Integrated a **service request workflow** connecting users (traffic authorities) directly with CCTV maintenance vendors.
- Developed **role-based dashboards** for Admin, Field Engineer, and Vendor to track issues and resolution progress.

Yatri Subidha V2 (Land Port Authority of India, Department of IT, WB)

- Built an **API-driven architecture** to handle user registration, slot booking, and status updates efficiently.
- Integrated **real-time slot availability** and travel schedule updates to ensure hassle-free travel planning.
- Enabled **QR-code based digital passes** to streamline verification at checkpoints and reduce manual errors.
- Added **SMS/email notifications** for booking confirmation, updates, and emergency alerts to ensure reliable communication.
- Developed **Admin Dashboard** for government teams to manage bookings, track travelers, and respond to user issues quickly.
